JOURNAL OF QUANTITATIVE CRIMINOLOGY—Volume 20, 2004

Journal of Quantitative Criminology is a refereed publication of research in crime and justice from such diverse fields as sociology, psychology, economics, statistics, geography, political science, and engineering. The journal publishes papers that apply quantitative techniques of all levels of complexity to substantive, methodological, or evaluative concerns of broad interest to the criminological community. Manuscripts may vary considerably in length. Detailed presentations of original research, methodological critiques, and papers that explore new directions for studying criminological topics are all welcome. Special issues and book-review essays that concern substantive areas in which significant quantitative research is ongoing are published occasionally.
